DETAILED ACTION

Drawings

1. The drawings are objected to because the blank boxes of figures 1-5. Please insert description labels within the boxes, 102, 202, 302, 402, 501 and 502. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2838

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 3-8 and 10-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Brokaw (5,917,311).

Brokaw discloses a voltage regulator circuit with a reference generator circuit with a plurality of inputs (L4-L5) that are connected to internal terminals and the subset of the plurality of internal terminal are connected to an external terminal (Vout).

Response to Arguments

4. Applicant's arguments filed 3/30/09 have been fully considered but they are not persuasive. Applicant amendment of claims 1 and 10 "wherein the output terminal is not connected to the external terminal" might be shown in Figures 1 and 2 but applicant's Figures 3-5 show the opposite, therefore Applicant can't add such a limitation especially since the dependent claims reflect limitation shown in Figures 3-5. With respect to Brokaw reference using applicant's argument Fig. 3 can be shown as voltage regulator (50) and output (52), reference generator circuit (52) and external terminal (Vout), therefore "the output terminal is not connected to the external terminal. With respect to the drawing, what Applicant considers a voltage regulator is a comparator.
